🌐 CODE & BUILD WEBSITES

Web Development Masterclass

2 Months Easy Practical Course for Class 8th, 9th & 10th Students

⭐ **What Students Will Learn:** HTML Structural Basics • CSS Styling & Colors • Basic JavaScript Logic • Live Website Projects

💻 CLASS 8th — Website Structure & Basic Styling

2 Months Duration

Students will learn how websites work, how to build web pages using HTML tags, and make them look beautiful with CSS colors, fonts, and layouts.

- 🌐 HTML Page Structure
- 🎨 CSS Colors & Fonts
- 📝 Online Bio Website
- 🚀 VS Code Basics

⚙️ CLASS 9th · More on Styling & JS Fun

2 Months Duration

Students will learn more on CSS styling using Flexbox, CSS hover effects, and add cool interactive features like popup alerts, theme toggles, and click buttons with JavaScript.

- 📐 CSS Flexbox Layout
- ⚡ JavaScript Clicks & Alerts
- 🎓 School Portal Page

🚀 CLASS 10th — Full Interactive Websites & Hosting

2 Months Duration

Students will build full working multi-page websites. They will code interactive forms, calculate simple data with JavaScript, and publish their website live on GitHub Pages!

- 🔗 Multi-Page Navigation
- 📝 Interactive Web Forms
- 🧠 JS Logic & Calculator
- 🌍 GitHub Live Web Hosting

🏆 **Final Result:** Every student learns coding, launches 3 real web projects online, and receives a Certificate!

Step-by-Step 2 Months Web Plan

Month 1: HTML & CSS Styling Basics | Month 2: JavaScript Logic & Live Hosting

💻 CLASS 8th — Simple & Practical Syllabus

Month 1: Web Fundamentals & HTML

- **How Web Works:** Web browsers, internet basics, and code editor (VS Code) setup.
- **HTML Basics:** Headings, paragraphs, line breaks, and adding text to web pages.
- **Images & Links:** Inserting photos, background images, and links to other websites.
- **Lists & Tables:** Creating simple bullet lists, numbered steps, and time tables.

Month 2: CSS Styling & First Project

- **CSS Basics:** Text colors, background colors, font styles, and border designs.
- **Box Model:** Understanding margins, padding, content boxes, and borders.
- **First Web Project:** Build a Personal Profile Page (Digital Resume / ID Card).
- **Showcase:** Present your webpage live in class to friends and teachers.

⚙️ CLASS 9th — Simple & Practical Syllabus

Month 1: More on Styling & CSS Layouts

- **CSS Flexbox:** Arranging cards, image galleries, and navigation menus easily.
- **Hover Effects:** Adding cool animations, button color changes, and hover zoom.
- **Web Icons & Fonts:** Adding Google Fonts and FontAwesome icons to pages.

Month 2: JavaScript Intro & Projects

- **JavaScript Basics:** Variables, popup alerts, and changing text using click buttons.
- **Interactive Features:** Creating Dark Mode / Light Mode toggle switch.
- **Main Project:** Build a Complete Interactive School Project Portal Page.
- **Web Review:** Testing site speed and fixing simple layout bugs.

🚀 CLASS 10th — Simple & Practical Syllabus

Month 1: Interactive Web Forms

- **HTML Forms:** Creating text input boxes, dropdown menus, radio buttons, and checkboxes.
- **JS Data Handling:** Reading input values from text boxes and validating forms.
- **JavaScript Logic:** Simple calculations (e.g., Simple Calculator or Quiz App).
- **Multi-Page Layout:** Linking Home, About, Services, and Contact Us pages.

Month 2: Real Web Build & Live Hosting

- **Interactive Project:** Build an E-commerce / Product Catalog Website with cart preview.
- **Git & GitHub Basics:** Uploading web code online safely and managing project files.
- **Live Web Hosting:** Publishing your website live on GitHub Pages with a free URL link!
- **Graduation Showcase:** Final Live Project Presentation with Parents & Teachers!

🎉 **Certification:** Web Developer Certificate, Live Website Link, and Parent Showcase Day!
